

Welcome to ROCKONN Rocketry Club!

Our rocket launching schedule is posted on the "Calendar Page", Launch dates normally start with a launch on the third Saturday in March and end with a launch the third Saturday in October, launching once a month on the third Saturday of the month. We do not have a launch date in July. The launch times generally start between 9 and 10 AM and end between 1 and 3 PM (temperature and wind conditions may affect exact times).

As previously stated, the normal launching dates are the 3<sup>rd</sup> Saturday of each month; however, we also have a back-up date on the following Sunday (3<sup>rd</sup> Sunday of the month) if weather conditions do not support launching on Saturday. The website should have the latest information. We will also send members an email at least 48 hours before the launch (possibly with further email updates) if there is a change in the launching date. If you need to contact other members of the club, our website has a case sensitive password to access the *membership list*, which contains available contact information for our members.

Members will need to provide information concerning any high-power rocketry certification they may currently have for levels one, two, or three. To become certified at a level, please let us know. We can generally accommodate NAR certification for levels one or two.

We will provide all launching equipment members should need, and unless members have an unusual need, we prefer they not bring their own.

We welcome all spectators, even well-behaved dogs, to our launches. Due to the barren landscape and dry conditions, we recommend bringing plenty of water and some type of shade to avert heat related health problems. If you bring some sort of shelter such as an "Easy-up", we suggest staking it in the ground as afternoon winds and dust devils can arise suddenly. Please be advised that we may not always be able to provide restroom facilities.

Directions to the launch site are on the "Team" Page. If you should encounter difficulty finding the site, please call 775/901-1834 on the day of the launch.

We think that members will find that Artesia Dry Lake is the perfect place to launch their rocket. We launch on a dry lakebed and, unlike most launch sites, you can drive or ride out to pick up your rocket. Due to the secluded nature of the site, we have been able to apply for a 30,000-foot ceiling waiver. This is the highest ceiling in Nevada with the exception of Black Rock.

We are looking forward to meeting you!

## ON-SITE APPLICATION

Hi Dude!

Welcome to ROCKONN Rocketry Club! Thank you for your application for club membership and your annual dues for 2019.

Our rocket launching schedule is posted on our website, and the year's launch dates normally would start with a launch on the third Saturday in March and end with a launch the third Saturday in October, launching once a month on the third Saturday of the month. We do not have a launch date in July. The launch times generally start between 9 and 10 AM and end between 1 and 3 PM (temperature and wind conditions may affect exact times).

Unfortunately, we have not yet received our 2019 waiver for the scheduled dates from the FAA. This appears to have been delayed due to the recent government shutdown. You may always check for the latest updates on the website.

As previously stated, the normal launching dates are the 3<sup>rd</sup> Saturday of each month; however, we also have a back-up date on the following Sunday (3<sup>rd</sup> Sunday of the month) if weather conditions do not support launching on Saturday. The website should have the latest information. We will also send you an email at least 48 hours before the launch (possibly with further email updates) if there is a change in the launching date. If you need to contact other members of the club, our website has a case sensitive password of "rocket" to access the *membership list*, which contains available contact information for our members.

We will provide all launching equipment you should need, and unless you have an unusual need, we prefer you not bring your own. If you have some concerns, please send an email or call 530/622-4030 and leave a message.

We welcome all spectators, even well-behaved dogs, to our launches at no cost. Due to the barren landscape and dry conditions, we recommend bringing plenty of water and some type of shade to avert heat related health problems. If you bring some sort of shelter such as an "Easy-up", we suggest staking it in the ground as afternoon winds and dust devils can arise suddenly. Please be advised that we may not always be able to provide restroom facilities.

Directions to the launch site are on the website. If you should encounter difficulty finding the site, please call 775/901-1834 on the day of the launch.

We think that Artesia Dry Lake is the perfect place to launch rockets. Unlike most launch sites, you can drive or ride out to pick up your rocket. Due to the secluded nature of the site, we have been able to apply for a 30,000-foot ceiling waiver. This is the highest ceiling in Nevada with the exception of Black Rock.

We are looking forward to seeing you again at the next launch!

Sincerely,

Janie Carpender

ROCKONN Secretary
